Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

This is an office action for serial number 10/698,738, entitled Umbrella Holder, filed on October 30, 2003.

Election/Restrictions

Claims 2, 8, and 19 have withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 8, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 6, 9-11, 13, 14, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Samuel, Jr. (Samuel) 5,749,386. Samuel discloses an umbrella holder comprising a shaft (12) having upper and lower end, means for attaching an umbrella comprising a cup assembly (figure 2, elements 15-17), segmented sections (13 and 14), means

Art Unit: 3632

for retaining at least two segments (column 2, lines 12dff), means for inserting a portion of the lower end into the ground (26), a lever (28) adapted to be stepped on to urge the end into the ground, and inherently teaches the method for holding an umbrellas comprising providing an umbrella holder having a shaft with upper and lower end and means for attaching, and inserting a lower end into the ground.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Samuel 5,749,386 in view of Voelkerding 3,285,554. Samuel discloses all of the limitation of the claimed invention except for the collar. Voelkerding teaches that it is known to have segments and a collar adapted to retain at least the two segments in linear alignment with each other when the collar is disposed over

Art Unit: 3632

a seam intermediate said at least two segments (figure 2, element 30 and figure 8, element 98). It would have been obvious to one having ordinary skill in the art to have modified Samuel to have included the collar as taught by Voelkerding since Samuel discloses segmented sections for extending the length of the shaft and the addition of Voelkerding means for securing the segments in extended position would allow facilitate extension of the shaft.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Samuel 5,749,386 in view of Garrette, Jr. (Garrette) 3,318,560. Samuel discloses all of the limitations of the claimed invention except for the pin. Garrette discloses it is known to have a means for retaining comprising a pin (46) in a first of segment with a hole to retain the segments in extended position (figure 6). It would have been obvious to one having ordinary skill in the art to have modified Samuel to have included the means for retaining as taught by Garrette for the purpose of providing a more secure means of extending the telescoping sections and to facilitate extension of the segments in and out of the locked position.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Samuel 5,749,386 in view of Brown

Art Unit: 3632

5,749,386. Samuel discloses all of the limitations of the claimed invention except for the ring. Brown teaches that it is known to have a pivoting lever attached to a ring adapted to surround the shaft (12 and 21). It would have been obvious to one having ordinary skill in the art at to have modified Samuel to have included the ring to the shaft having the pivoting lever as taught by Brown for the purpose of providing a more secure means for inserting the shaft into the ground.

Claims 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Samuel in view of Churillo

6,199,819. Samuel discloses all of the limitations of the claimed invention except for the means for supporting being a clip. Churillo teaches that it is known to have a clip (Figure 2). It would have been obvious to one having ordinary skill in the art to have modified Samuel to have included the clip as taught by Churillo for the purpose of easily attaching the shaft to an object without the need to modify the object.

Allowable Subject Matter

Claims 15 and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd

Art Unit: 3632

paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

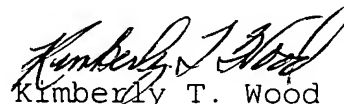

The prior art discloses conventional umbrella holders and telescoping shafts.
